

MIC English Program TOEIC Changes

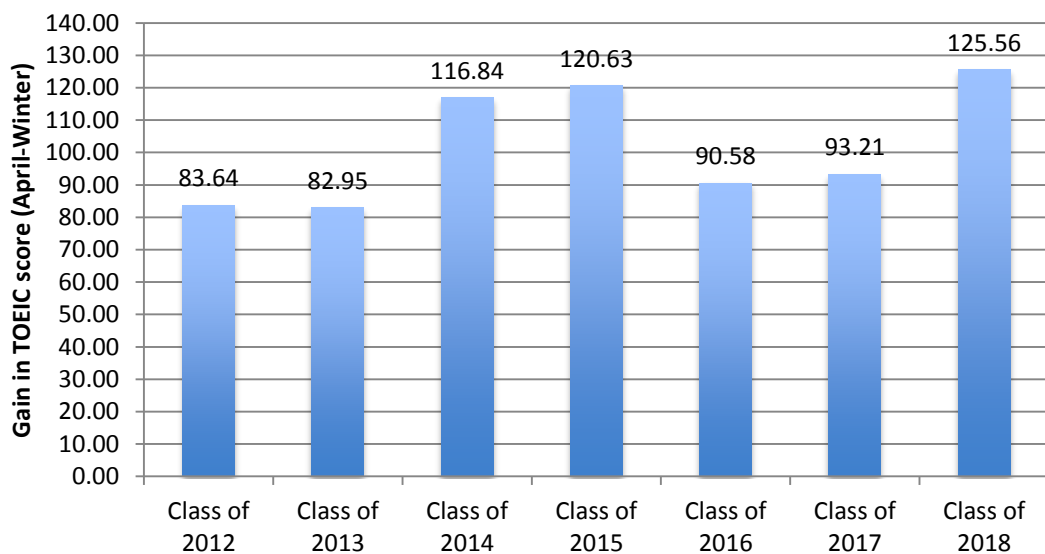

These charts show the average gains in TOEIC score over the first two semesters at MIC. Of course, it would be ideal to show gains over the first three semesters, but many of our second-year students don't take the test in July.

The first chart shows gains for all students. The other charts show gains for different groups of students, divided up by their initial TOEIC score.

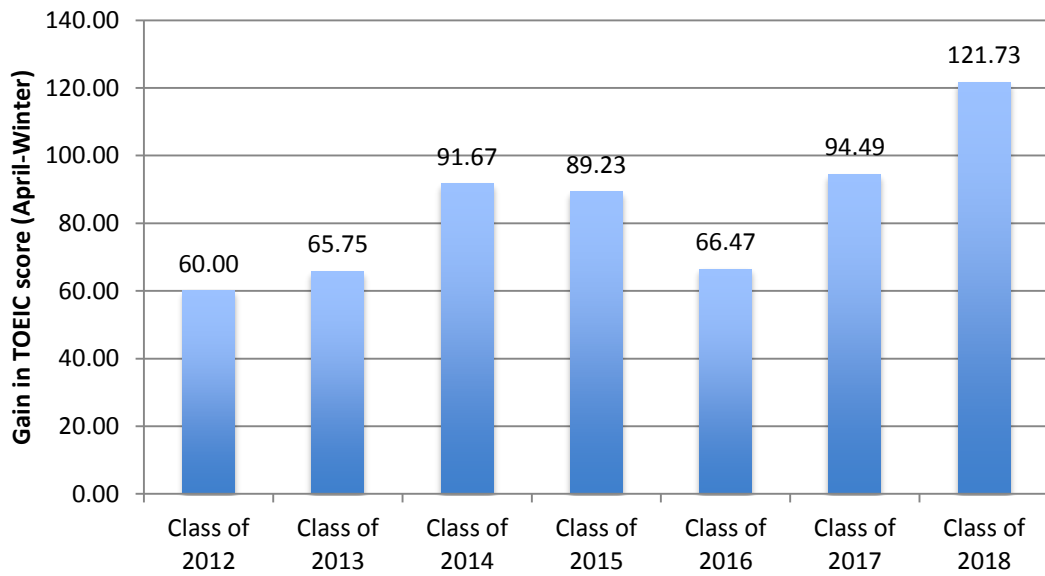

All students

Students with first TOEIC <300

Students with first TOEIC 300-395

Students with first TOEIC 400+
